June 2011

Dear Precalculus student,

Many of the skills you will need for Accelerated Precalculus and Physics were covered in previous courses thanks to the hard work of you and your former math and science teachers. However, it may have been a long time since you systematically practiced these skills. This summer, you and all other Precalculus students will be completing a summer review in order to get you ready for next school year.

Please go to the following website to READ and PRINT the Precalculus Summer Study Guide.

<http://deeringmath.com/precalc/precalcbook/index.html>

As you work through the guide, try to make the vocabulary, definitions, and symbolic manipulations second nature so you will be able to use them quickly and appropriately when you are studying Accelerated Precalculus and Physics. Print the study guide, mark it up, and then complete the summer study guide practice test that is found on this website.

When you enter the Precalculus class in the fall or the spring, you will be tested on the concepts contained in this review guide. It is your responsibility to practice and find the necessary resources to bring your skills in accord with the demands of Precalculus.

Feel free to email Ms. Natarajan at [natarp@portlandschools.org](mailto:natarp@portlandschools.org) if you have further questions throughout the summer.

Have a great summer!

Mr. Landry, Ms. Natarajan, and Mr. Olson
